

The Office of Clinical Research has moved to FMI I-625, accessible from the “G” corridor side of “I” corridor.

Directions:

The I corridor is at the far east end of the old hospital (The Ellis Avenue side). Due to other construction on the 6th floor, it would be best to use Elevator G (located at the farthest east end of the “G” corridor near med legal/global health). Take the G elevator to the 6th floor and exit to the left around the corner – you will see double doors with a sign saying Office of Clinical Research.
